

Smart-View Tracking

Enabling your business to reduce risk and save costs

Smart-View Tracking is a comprehensive asset tracking management software suite offering a customizable platform and allows tracking of assets in near real-time.

Managing your assets becomes much easier with Smart-View Visio-Tech's IoT-enabled asset tracking solution, which allows you to remotely track your equipment and fleets, enabling your business to reduce risk, save money and create new revenue streams.

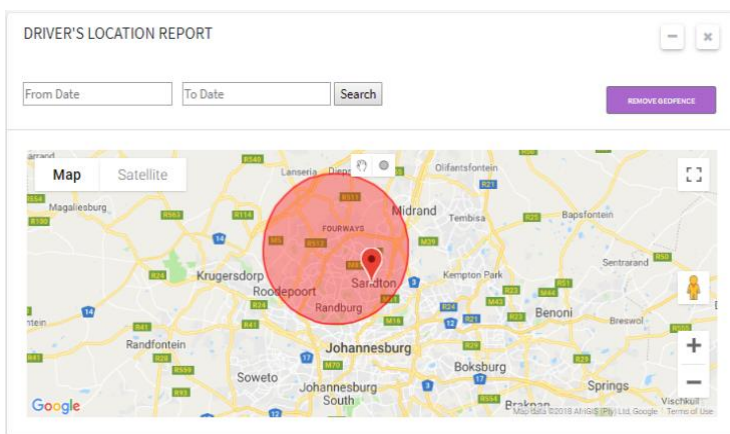

Smart-View Tracking Provides:

- Live Tracking (Hourly Tracking Information).
- Indoor (Warehouse) and Outdoor (Delivery/service routes) tracking
- Securely tracking the location and health of valuable assets and inventory.
- Geofence your valuable assets and get instantaneous alerts.

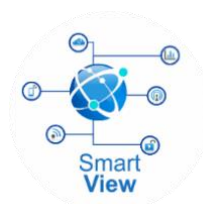

Benefits

Smart-View Tracking Geolocation

- Easy installation and use.
- Track Assets in real-time.
- Geofence your assets.
- Locate and identify any lost or stolen items for better theft prevention and recovery.
- Smart-View enables IoT solutions for asset tracking that make it easier to connect and manage all your assets from a single web-based IoT portal.
