

The Digital Foundation for Utility Visibility & Automation

A mobile first digital data capture solution replacing paper and spreadsheets with standardised, automation ready utility data.

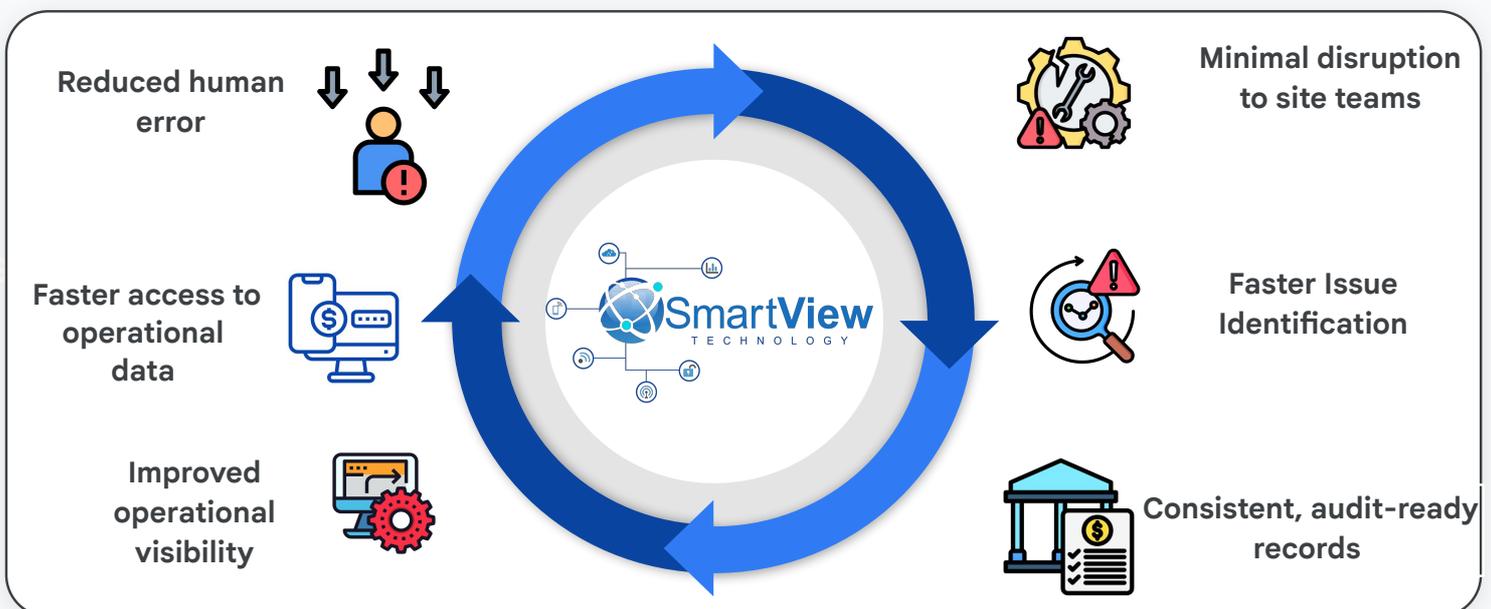

The Problem

Most food and beverage sites still rely on paper logbooks and manual spreadsheets to capture operational and utility data. This results in delayed reporting, inconsistent data formats, and a high risk of human error making audits difficult, reducing operational visibility, and leaving no clear path toward automation or optimisation.

The Smart-View Entry Solution

- ✓ **Mobile application for technicians**
Capture readings and operational data on-site, in real time
- ✓ **Digital forms & structured data**
Standardised templates replace paper and Excel
- ✓ **Real-time data availability**
No delays, no re-capturing, no manual consolidation
- ✓ **Zero spreadsheets / paper processes**
Single source of truth from day one

Benefits:

Business Value

Creates a clear digital baseline for operations

Removes data silos and manual effort

Enables faster decision-making

Automation-ready data from day one

Clear upgrade path to intelligence & optimisation

How it Works in Practice

Mobile Data Capture

Technicians capture utility readings on-site using a simple mobile application.

Centralised, Structured Data

All data is instantly stored and standardised in the cloud as a single source of truth.

Real-Time Operational Visibility

Managers access clean, consistent data in real time for faster, better decision-making.

Automation-Ready Foundation

Paper and spreadsheets are eliminated, preparing the site for automation and analytics.

Fast, Low-Risk Deployment

Quick to deploy with minimal effort, allowing sites to see value without operational risk.

Immediate Operational Impact

Delivers instant improvements in visibility and data accuracy with no disruption to existing processes.

Proven Value Before Automation

Provides clear ROI upfront, enabling confident progression to automation when the business is ready.
